TEN YEARS OF UNDERWATER VIDEO FROM ANTARCTICA

An evening with Henry Kaiser

Join us Wednesday, October 23rd at 7 PM

ABOUT THE TALK: Join us for this special chance to see underwater video from ten seasons of diving under the Ross Sea ice near Antarctica's McMurdo Station, presented by videographer Henry Kaiser. This incredible footage will be accompanied by live electric guitar played by Kaiser. For a sneak preview, visit <http://www.youtube.com/watch?v=e0oCRT-BTU8>.

ABOUT THE SPEAKER: Henry Kaiser is a scientific diver in the US Antarctic Program. 2012 marked his tenth deployment beneath the twenty-foot-thick ice of the Ross Sea. Previously, Kaiser taught underwater research at UC Berkeley for 17 years, where he was an early pioneer in the use of underwater video for scientific research and diver training. Kaiser has more Antarctic under-the-ice footage in films and TV shows than any other underwater cameraman. With ten scientific diving deployments to Antarctica, he also likely has more dives under fast ice than any other professional videographer. Kaiser has worked on four different features with Werner Herzog, including *Encounters at the End of the World* and *Grizzly Man*. Kaiser is also a well known experimental guitarist, and has appeared on more than 250 albums since the late '70s.

Recommended donation for non-Friends of MLML: \$8
